ABOUT ME

I am an enthusiastic individual with great problem solving skills and an probably the most motivated person I know. I look forward to starting my career as a full stack web developer (or similar positions) in an environment that stretches my current knowledge and encourages me to learn new things. I may not have 37+ years experience, I actually have 0 professional experience when it comes to programming. But what I do promise to bring is the desire to learn, grow and certainly make an impact.
I will not disappoint.
